Name	Width	Depth	Height	Visible
Mannequin	17.375	20.75	68.875	☒

Double-click to modify mannequin

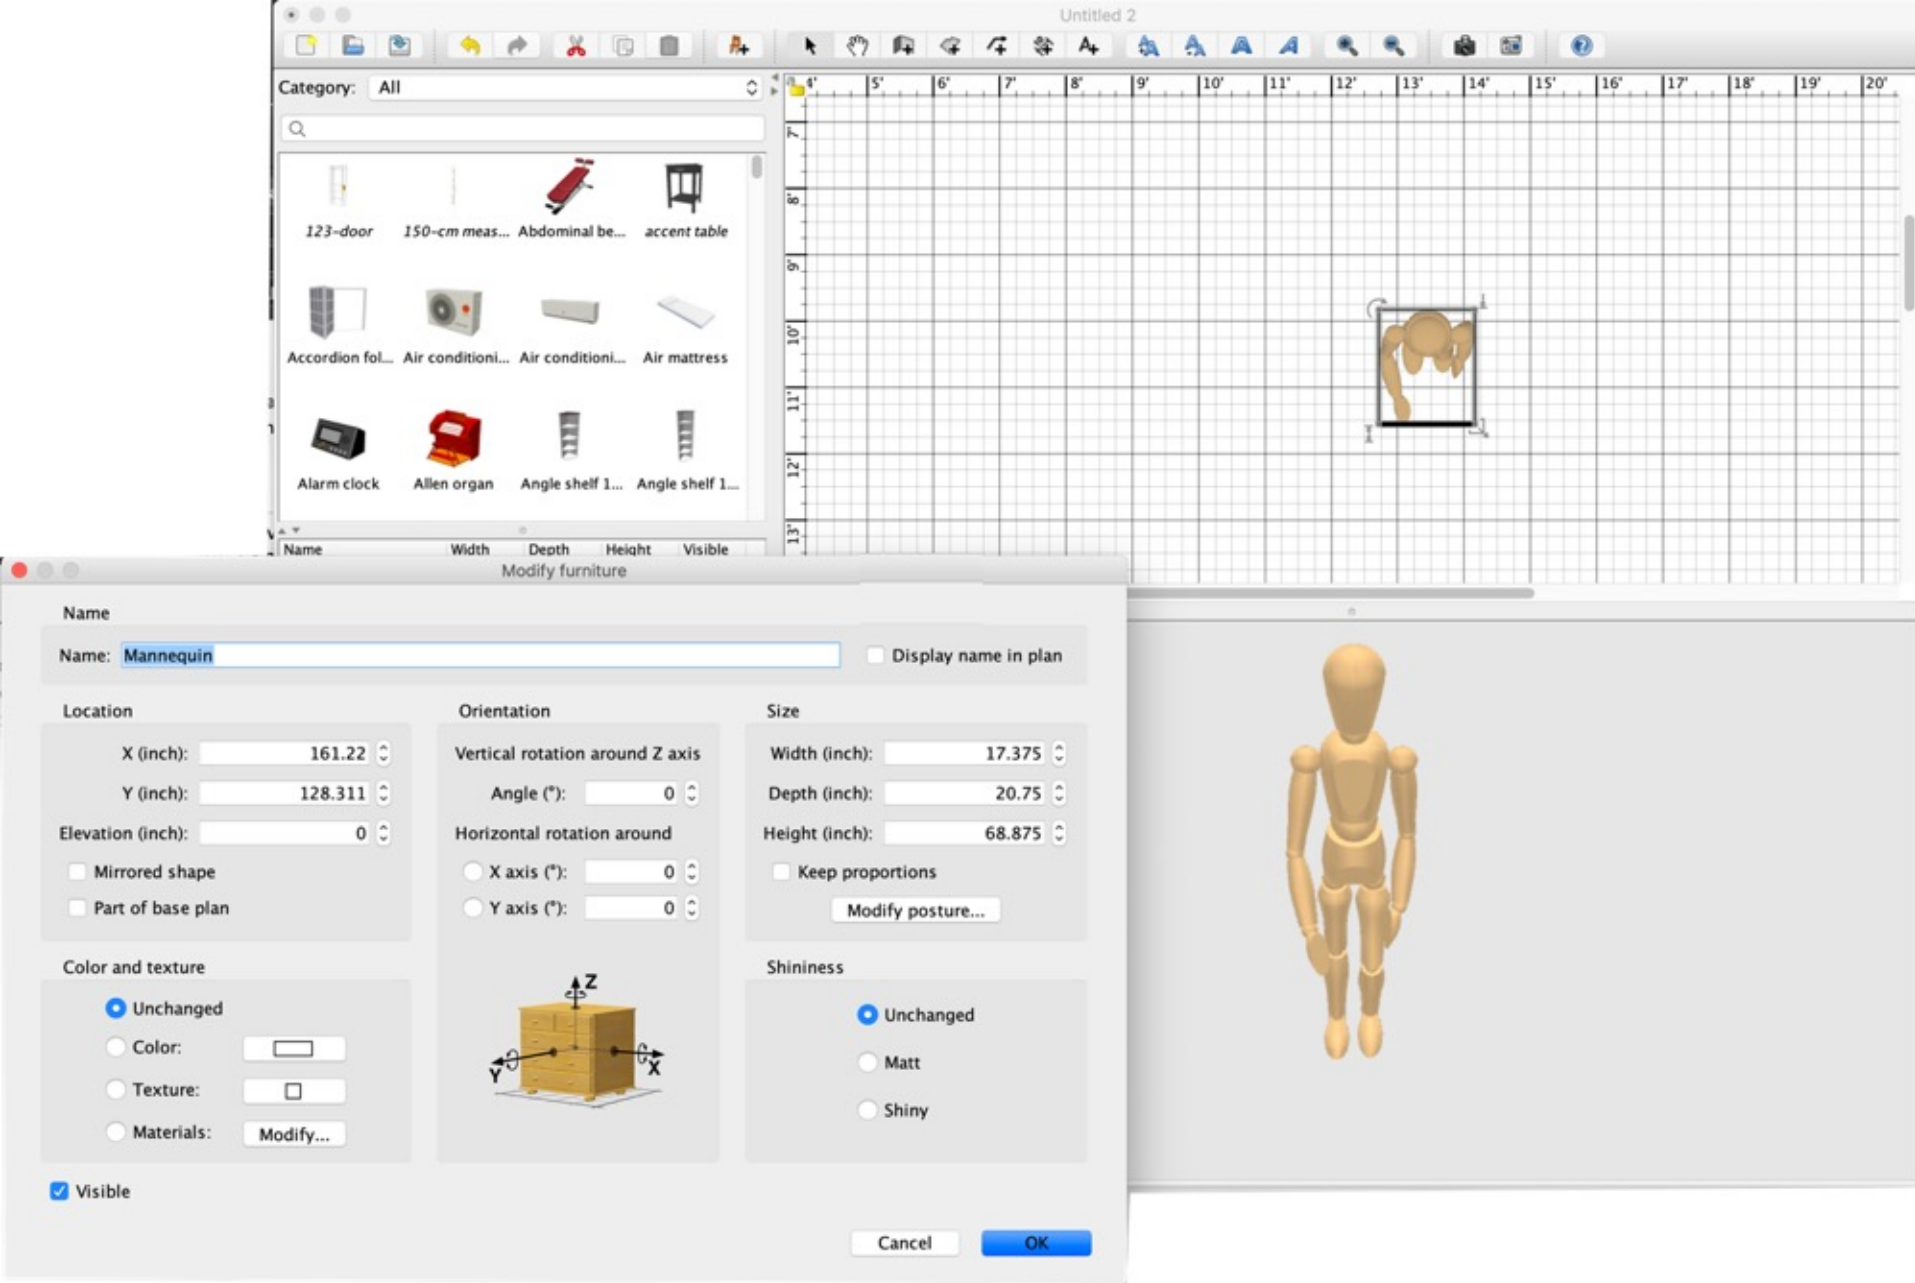

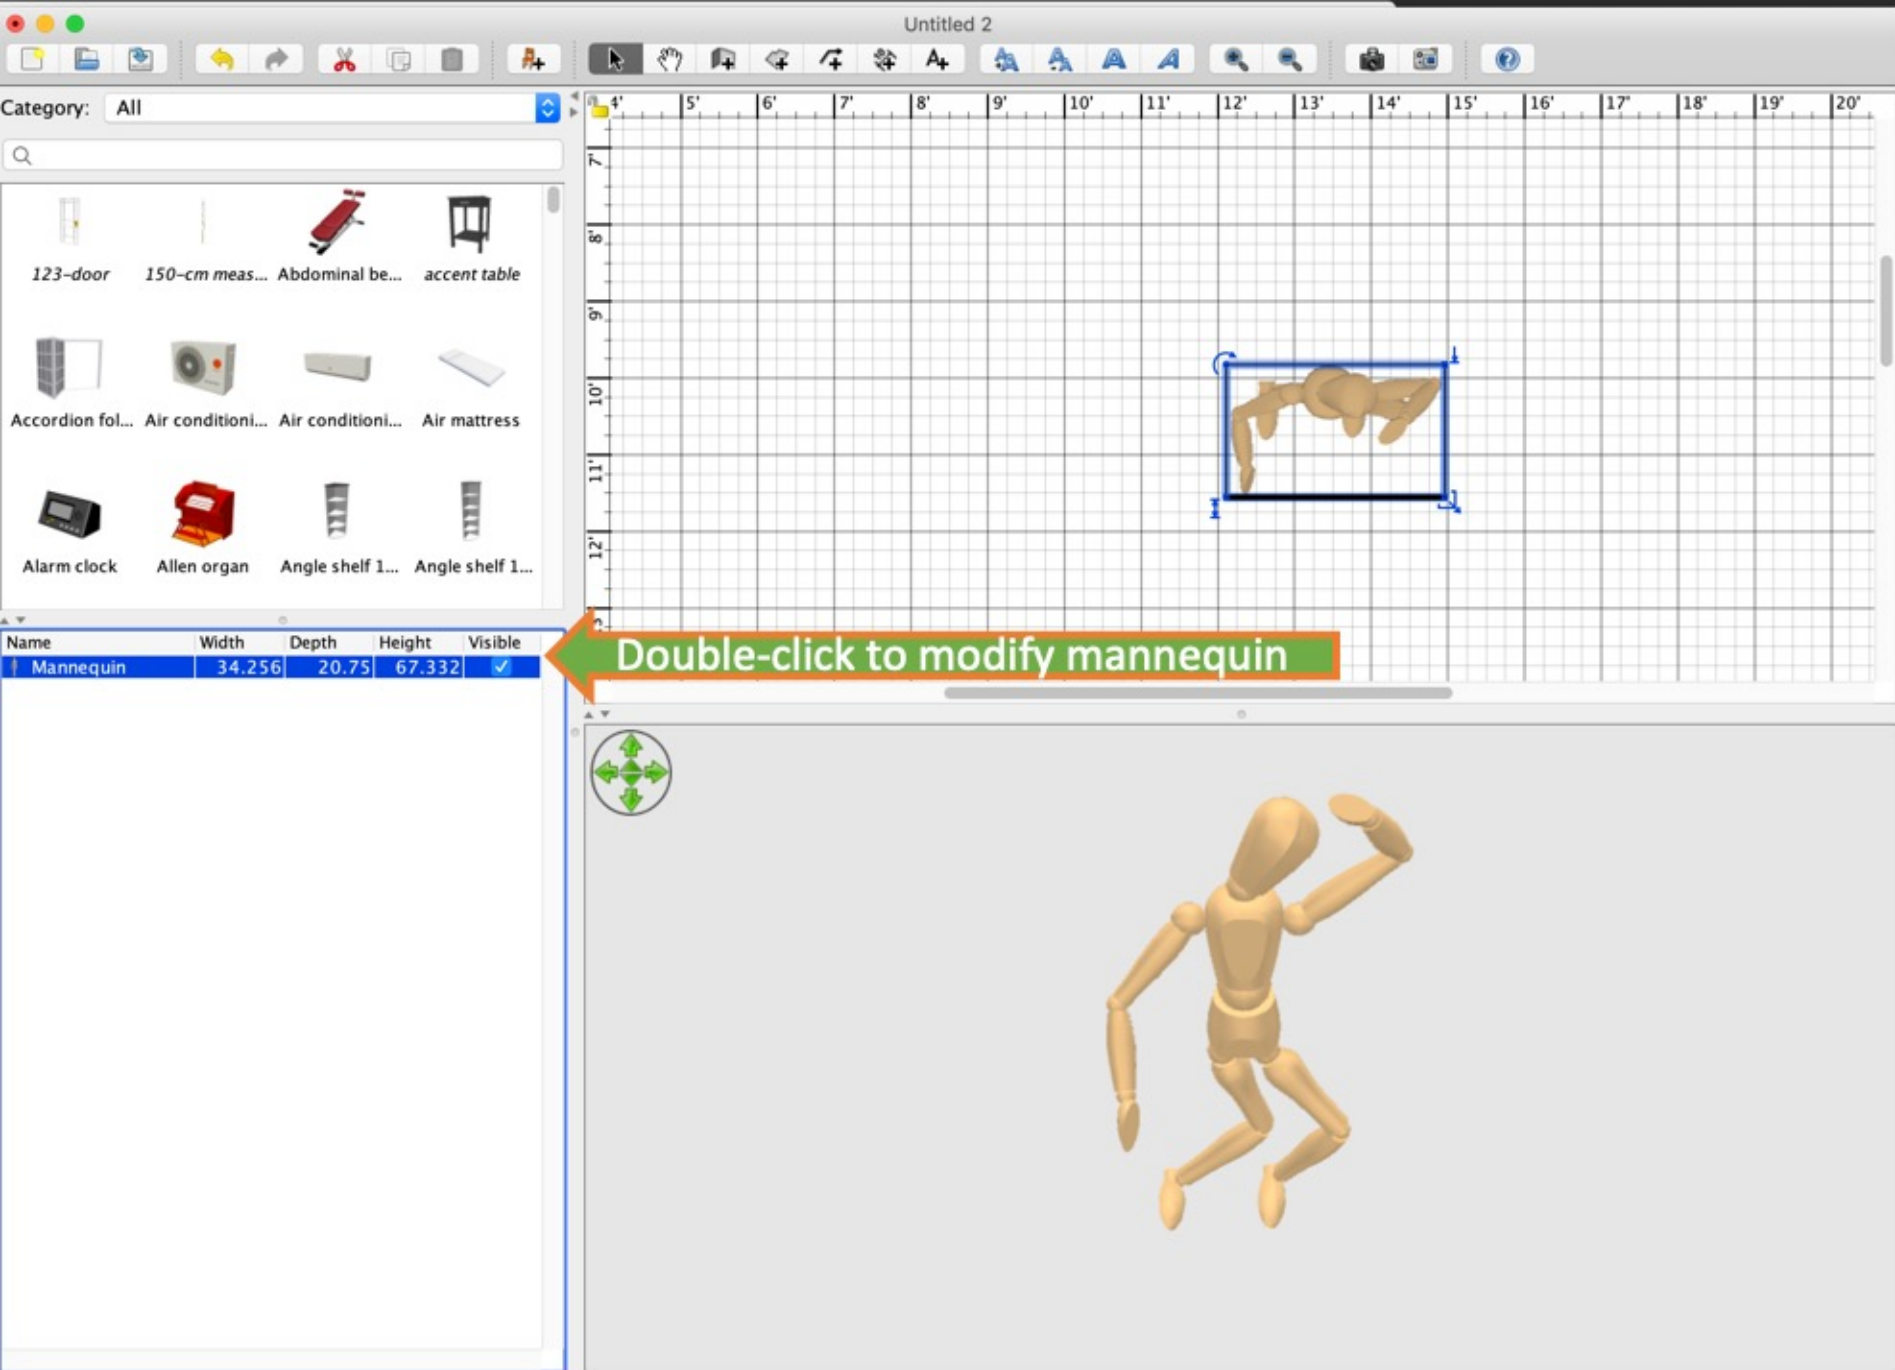

Place cursor on body part, move while holding left button. Repeat for other body parts. Switch views as needed. If the posture gets too screwed up, 'reset shape'.

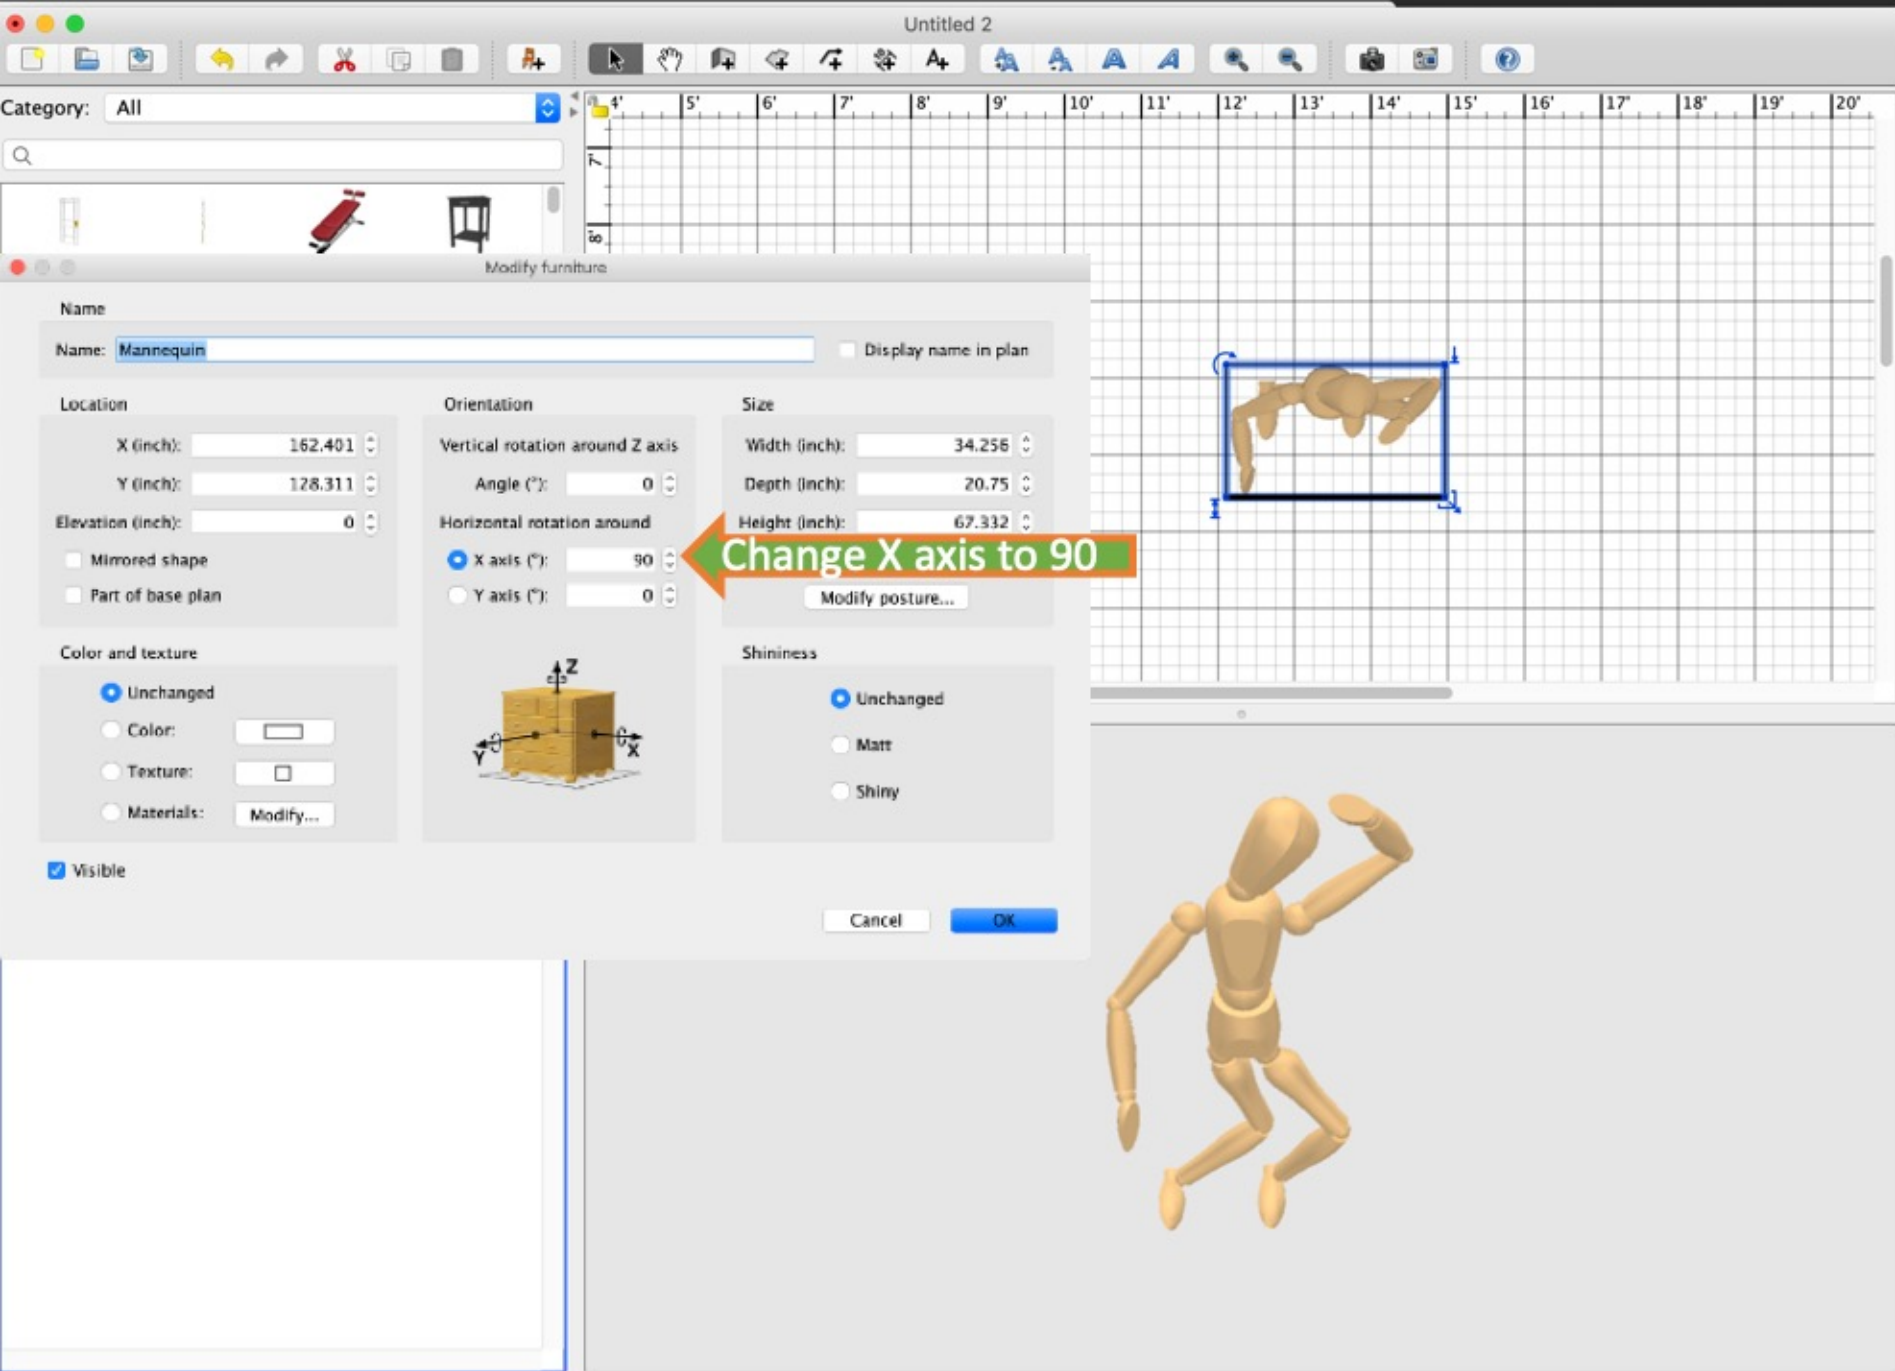

When satisfied with new posture, click “OK”.

Then click "OK". You will not see the new posture in the windows to the right until after this step.

Oooops. I left him standing, so need to rotate him down.
